- Investigator recruitment and site selection
- Medical monitoring
- Medical writing
- Project management
- Protocol feasibility
- Quality assurance
- Regulatory affairs
- Safety/pharmacovigilance

Development and Regulatory Resources Around the World

You don't have time for delays. With extensive access across the globe and local regulatory expertise, you will find a helpful hand whenever and wherever you need it. Clinipace is the midsized CRO that offers you the complete Phase I-IV clinical research and development solutions you need across all regions of the world.

Therapeutic Experience That Drives Your Success

Our team is both collaborative and consultative, while being committed to helping you find efficiency and success throughout your drug development journey. We specialize in gastroenterology, nephrology and urology, oncology, rare disease, and women's health, but are experienced in a variety of additional key therapeutic areas.

Gastroenterology

The gastroenterology research environment is competitive. At Clinipace, we understand the importance of moving your studies from study startup to study completion, both quickly and efficiently.

Nephrology and Urology

Nephrology and urology studies have unique challenges, including the low prevalence of the disease. At Clinipace, we know how to simplify and streamline your studies with a collaborative team and state-of-the-art technology.

Oncology

Oncology studies have their own nuances: from the ever-changing regulatory landscape to novel and increasingly complex study designs to personalized treatment options. At Clinipace, we can take care of your entire oncology program.

Rare Disease

Patient recruitment and retention for rare disease indications are challenging. So, at Clinipace, we focus on creating relationships that reach patients and support strategies that help you meet your enrollment goals.

Women's Health

Often, the complexities of women's health studies require a holistic eye to manage. At Clinipace, we work strategically to advance care and support strategies that help you meet your enrollment goals.

Additional Therapeutic Expertise

Cardiology

CNS

ENT

Immunology

Infectious Diseases and Vaccines

Nutrition

Respiratory

Make Faster Decisions With Our Team and Clarity Clinical Technology

Gain a holistic, up-to-date view of your entire program with Clarity Stack® clinical technology. Clarity Flow's simplified data collection removes information silos, making analysis and reporting easy. Using Clarity Insight, our clinical analytics team helps you identify issues and make proactive decisions with near real-time data, allowing you to watch your progress against plan and know how your patient data is performing.

ABOUT CLINIPACE

At Clinipace, a global, full-service contract research organization (CRO), our approach to clinical research is personal. We deliver a level of collaboration and flexibility not possible in a traditional CRO environment. With our personalized services and solutions, local regulatory expertise and therapeutic leadership, we overcome the most difficult industry challenges across all major therapeutic areas including oncology, gastroenterology, nephrology and urology, rare disease, and women's health. We strive to improve the way clinical research is performed and impact the future of health care using the most advanced technology and a CHALLENGE ACCEPTED approach.
